CSE 121 Lab 1 Report

Calvin Owen

1.1

For setting up the wifi, I couldn't get eduroam working, and instead opted to set up connection to my home wifi. I used the following resources and commands while trying to set up eduroam.

https://askubuntu.com/questions/262491/connect-to-a-wpa2-enterprise-connection-via-cli-no-desktop

nmcli con edit id "eduroam"

set 802-1x.identity "xxx@ucsc.edu"

set 802-1x.password "xxx"

set 802-1x.system-ca-certs yes

set 802-1x.eap peap

set 802-1x.phase2-auth mschapv2

save

quit

For setting up my home wifi, I followed the instructions at

https://linuxconfig.org/ubuntu-20-04-connect-to-wifi-from-command-line

Which may or may not have been necessary, it didn't really do much for me.

I then used the following resource to get the commands to connect to the wifi.

https://ubuntu.com/core/docs/networkmanager/configure-wifi-connections

Commands

'nmcli d' to list networks

'nmcli d wifi xxx password xxx' to connect

'nmcli d' to see connected state

1.2

I didn’t have any problems with 1.2

1.3

I referenced the following documentation for figuring out problems with the project config.
https://docs.espressif.com/projects/esp-idf/en/v4.3/esp32/api-reference/system/freertos.html#task-api

https://docs.espressif.com/projects/esp-idf/en/stable/esp32/api-guides/build-system.html#custom-sdkconfig-defaults
